I am a Full Stack Developer with experience in web application development. I am self-taught and have experience in the role of Team Lead, where I have focused on the planning and organization of technical and human resources in assigned projects. I always look for quality task resolution and project management, using good practices and agile methodologies. I am characterized by my proactivity, continuous learning, effective communication and empathy. Likewise, as a Bachelor of Administration, with more than 10 years of graduation, I am trained in resource management, leadership and organizational motivation. In the IT field in GIT, data structures, algorithms and management of the following technologies and frameworks: Typescript, Next.Js, Redux, Redux Toolkit, PERN stack, Nest.Js, Zustand, Jest, Tailwind CSS and Bootstrap. I am proficient in Java (Spring Boot), PHP and MySQL. I'm looking for new challenges with React Native and Python. Currently, I am looking for new challenges to continue growing within the community and as a Web Developer. I invite you to read my CV to learn more about my skills and experience.

PROJECTS

Ecommerce-Express Sept. 23 – Oct. 23. Personal project.
This is an eCommerce project, which is built using React with redux to store data. https://my-json-server.typicode.com/ API has been used to create dummy product data. Bootstrap is used for styling. The product can be added or removed from the cart. The product can be added, updated or removed from the redux store. It is a personal challenge that is designed to improve knowledge and skills in the languages implemented.
- Front: JavaScript, React, CSS, Bootstrap, Autho, Redux.
- Link deploy: https://ecommerce-express-mu.vercel.app/
- Link repo: https://github.com/Orliluq/Ecommerce-Express

Ecommerce-Techi Oct. 23. Personal project.
It is an online e-commerce store that offers an intuitive shopping experience for its customers. Project on my own initiative in search of strengthening knowledge and skills and providing valuable information about the scope and my progress in the code and good practices.
- Front: JavaScript, React, Redux, Tailwind CSS.
- Link deploy: https://ecommerce-techi.vercel.app/
- Link repo: https://github.com/Orliluq/Ecommerce-Techi

PF- DLCA Technology Ago. 23 – Sep. 23. Academic experience Bootcamp Henry.
Design and develop a real e-commerce application. This project is a proposal for a Venezuelan company that was offered the development of an ecommerce type app that includes: UX/UI, user interface, display of featured products and suppliers, authentication, searches, Autho, filters and orders, controlled form, payment gateway, chatbot, Redux and states, faq, pagination, routes, controllers and database. Group project of your choice, to complete the requirements demanded by Henry to carry out the bootcamp and evaluate technical competencies in all the technologies and frameworks implemented within the entire academic process.
- Front: JavaScript, React, CSS, Bootstrap, Autho, Redux.
- Back: Node.js, Express.js.
- Database: PostgreSQL y Sequelize.
- Link deploy: https://pf-dlca-technology.vercel.app/
- Link repo: https://github.com/Ftuberquia/PF-DLCA-technology.git.
